SUMMARY

Junior Full Stack Developer with experience building SaaS platforms, internal tools, and back-office systems. Skilled in React, Vue.js, Next.js, TypeScript, Laravel, Spring Boot, PHP, Java, MySQL, PostgreSQL, and Supabase. Focused on REST APIs, JWT/OAuth authentication, code refactoring, testing, and clean, scalable software.

PROFESSIONAL EXPERIENCE

Jaestic SL — Full Stack Developer

Tarragona | Oct 2025 – Present

- Refactored and improved Vue.js and Laravel applications, reducing duplicated logic and improving maintainability across frontend, backend, and database-driven workflows.
- Implemented internal services and business features using Laravel, PHP, MySQL, REST APIs, and modular architecture patterns.
- Improved backend security by working on JWT/OAuth authentication, access control, protected routes, request validation, error handling, and safer API workflows.
- Optimized business logic, database queries, Eloquent ORM interactions, and microservice-oriented modules to improve reliability and scalability.
- Debugged production issues, resolved technical incidents, reviewed legacy implementations, and improved application stability through cleaner backend logic.

Performance Labs SL — Full Stack Developer

Remote | July 2025 – Sept 2025

- Developed features for an AI-powered SaaS platform focused on automating social media content creation and management.
- Built frontend modules with Next.js, React, TypeScript, and Tailwind CSS, using reusable components, typed props, and clean application structure.
- Integrated Supabase/PostgreSQL and implemented Vitest tests to validate business logic, improve reliability, and reduce regressions.

Goil Security SL — Frontend Developer Intern

Tarragona | July 2024 – June 2025

- Developed frontend features for a SaaS back-office platform using React, TypeScript, and Tailwind CSS.
- Built reusable UI components and integrated frontend views with backend API data flows, including forms, tables, filters, and client-specific workflows.
- Improved UX, fixed bugs, and contributed to permission-aware and role-based interface flows.

SKILLS

- **Frontend:** React, Next.js, Vue.js, TypeScript, Tailwind CSS
- **Backend:** Laravel, Spring Boot, Node.js, PHP, Java
- **Databases:** MySQL, PostgreSQL, MongoDB, Supabase
- **Tools:** Git, GitHub, GitLab, Vitest
- **Practices:** REST APIs, JWT, OAuth, microservices, MVC, Eloquent ORM, testing, refactoring, debugging, clean code, AI-assisted development, problem solving
